BIKE TRAVEL BAGS – FLIGHT INFO

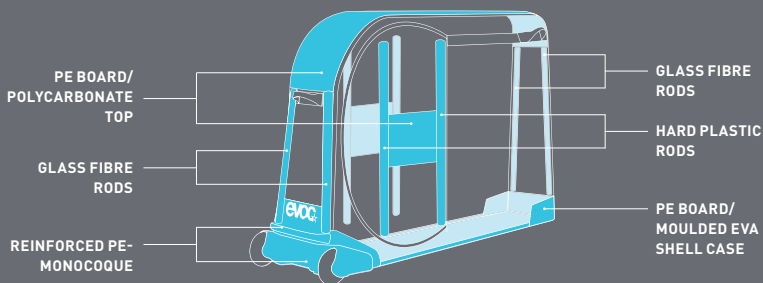

EVOC BIKE TRAVEL BAGS ARE NOT SOFTBAGS!
All EVOC bike travel bags are **HYBRID CONSTRUCTIONS** with high impact absorption abilities and offer a maximum in protection.

We use rigid materials where necessary and soft materials where possible.

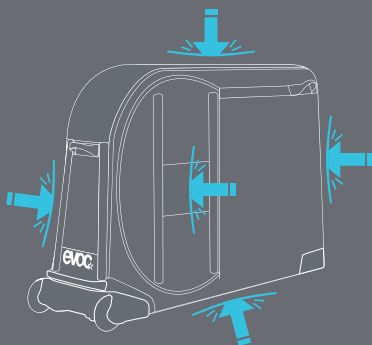

All EVOC travel bags have a rigid bottom and top construction, additionally we use fiberglass reinforcements on the side panels to protect the bikes from impact.

EVOC bike travel bags use high quality, heavy duty polyester fabrics.

DAMAGE FREE TRANSPORT

MAXIMUM PROTECTION
The fragile areas are optimally protected by intelligent reinforcing elements (polycarbonate covers, moulded EVA shell cases, PE boards and rods, foam padding) for the neuralgic points.

OPTIMAL FORCE DISTRIBUTION
As the frame is positioned upright, the areas of the bike that can take stress (saddle, saddle post, down tube, front set, head tube, fork) are actively used to deflect pressure from the exterior.
