

ZIP-ON ABS TECHNOLOGY

ABS AVALANCHE AIRBAG SYSTEM

The ABS avalanche airbag is a system that can help to prevent burial in an avalanche. Pulling the handle of the ABS avalanche airbag activates the two airbags in seconds. The volume of the airbag allows a skier or snowboarder to stay on the surface of the avalanche prevent it from slipping, even during action-loaded manoeuvres. At the same time, useful gaps and aeration channels ensure optimal ventilation across the entire back.
